

# Regional Geology of the Bonaparte Basin

## Figure captions

- Figure 1** Location map showing the sedimentary basins of Australia's North West Shelf.
- Figure 2** Map of the Bonaparte Basin showing bathymetry, petroleum well distribution and oil and gas fields.
- Figure 3** Tectonic elements map of the Bonaparte Basin showing bathymetry, petroleum well distribution and oil and gas fields.
- Figure 4** Map of the Petrel Sub-basin showing bathymetry, petroleum well distribution, oil and gas fields and pipelines.
- Figure 5** Tectonic elements map of the Petrel Sub-basin showing bathymetry, maximum hydrocarbon shows, oil and gas fields and pipelines.
- Figure 6** Seismic section (line r9710003) across the Petrel Sub-basin highlighting the Paleozoic depocentre and thin Mesozoic sedimentary succession.
- Figure 7** Seismic section (line s100r/05) across the Petrel Sub-basin showing example of salt-tectonics in Gull 1 area).
- Figure 8** Stratigraphic chart for the Bonaparte Basin showing hydrocarbon occurrences (Geologic Time Scale after Gradstein et al, 2020). (*Note: for Petrel Sub-basin Devonian and Carboniferous stratigraphy refer to Figure 9a*).
- Figure 9** Stratigraphic chart for the Petrel Sub-basin showing well intersections of hydrocarbons; **a**) Devonian to Permian interval; **b**) upper Permian to Neogene interval (Geologic Time Scale after Gradstein et al, 2020).
- Figure 10** Map of the Vulcan Sub-basin showing bathymetry, petroleum well distribution, oil and gas fields and pipelines.
- Figure 11** Tectonic elements map of the Vulcan Sub-basin showing bathymetry, maximum hydrocarbon shows, oil and gas fields and pipelines.
- Figure 12** Stratigraphic chart for the Vulcan Sub-basin showing hydrocarbon discoveries (Geologic Time Scale after Gradstein et al, 2020).
- Figure 13** Seismic section (line n98/r02) across the Vulcan Sub-basin highlighting the depocentre and rift architecture.
- Figure 14** Stratigraphic chart for the Ashmore Platform showing hydrocarbon discovery of Brown Gannet 1 (Geologic Time Scale after Gradstein et al, 2020).
- Figure 15** Map of the Londonderry High showing bathymetry, petroleum well distribution, oil and gas fields and pipelines.
- Figure 16** Tectonic elements map of the Londonderry High showing bathymetry, maximum hydrocarbon shows, oil and gas fields and pipelines.
- Figure 17** Stratigraphic chart for the Londonderry High showing hydrocarbon discoveries (Geologic Time Scale after Gradstein et al, 2020).

---

<b>Figure 18</b>	Stratigraphic chart for the Flamingo/Sahul synclines and the Nancar Trough showing hydrocarbon discoveries (Geologic Time Scale after Gradstein et al, 2020).
<b>Figure 19</b>	Map showing petroleum exploration permits, retention and production licences and operators in the Bonaparte Basin.
<b>Figure 20</b>	Map showing petroleum exploration permits, oil and gas fields and petroleum production facilities in the Bonaparte Basin.
<b>Figure 21</b>	Schematic time-space diagram of the Jurassic Vulcan-Plover petroleum system in the Vulcan Sub-basin (modified after Edwards et al, 2004).
<b>Figure 22</b>	Geological cross-section of the southern Petrel Sub-basin (modified after Miyazaki, 1997).
<b>Figure 23</b>	Schematic diagrams showing hydrocarbon play types in the central Petrel Sub-basin.
<b>Figure 24</b>	Schematic diagrams showing salt-related plays in the central Petrel Sub-basin.
<b>Figure 25</b>	Schematic diagrams showing hydrocarbon play types in the southern Vulcan Sub-basin.
<b>Figure 26</b>	Schematic diagrams showing hydrocarbon play types in the central Vulcan Sub-basin.
<b>Figure 27</b>	Seismic cross sections and conceptual diagram across the central Vulcan Sub-basin showing structural complexity and salt diapirism.
<b>Figure 28</b>	Sequence stratigraphic well correlation across the southern Vulcan Sub-basin (modified after O'Brien et al, 1996).
<b>Figure 29</b>	Schematic diagrams showing hydrocarbon play types in the Nancar Trough and the Sahul Syncline.
<b>Figure 30</b>	Map showing marine reserves, marine parks, multiple use zones and ecological features in the Bonaparte Basin.
